This figure displays a 2D binary image, characterized by a high contrast between black and white regions. The image features a complex, symmetric pattern. It includes several thick, horizontal black bands that span a significant portion of the vertical axis. Between these bands, there are numerous thin, vertical black lines that create a grid-like structure. The pattern is highly repetitive and suggests a structured data visualization or a specific signal processing output.

A black and white photograph of a person's face, heavily redacted with black bars, appearing to be in a dark, enclosed space like a car.

Good news! We're making it easier to get a replacement account number if your account is compromised.

Starting November 17, 2019, if your account is compromised, we can simply issue you a replacement account number without the hassle of closing your existing account and opening a new one. This will allow you to continue using your existing debit card.

We've updated our Deposit Account Agreement to explain this change:

We can assign and transfer your account information and documentation to a replacement account number at our discretion. We may make this assignment when your account is reported compromised by you or any signer. If we issue you a replacement account number, this Deposit Account Agreement governing you and your account will continue to apply, without interruption, as if you retained the discontinued account number.

Please call us at the number at the top of this statement if you have any questions.
